Note 1: The gross area of the cutblocks are shown on the maps and tables. The gross area includes Wildlife Tree Retention Areas (WTRAs), riparian reserves, and other buffers or reserves that may be required depending on the site. As such, the total area shown on the map will not be fully harvested, resulting in the Net Harvest Area which is not known until late stage engineering.

Note 2: **Assessment Definitions:**
AIA: Archaeological Impact Assessment
VIA: Visual Impact Assessment

TSFA (THA): Terrain Field Assessment, also known as Terrain Hazard Assessment.
WATER: A Hydrologic Assessment when working within community watershed
